

Dennis Sage Home Entertainment Statement of Warranty

Workmanship Warranty

As a member in excellent standing with the Arizona Registrar of Contractors, our two- year workmanship warranty is defined by them. There are several guidelines described in their policy. We encourage you to visit them online to better understand the warranty. roc.az.gov

Labor Warranty

We offer a 90- day labor warranty that starts when the original scope of work is mostly complete. In that period, we will return to the location of the installation three additional times at your request to review the system operation, provide additional training and make sure that the system is fully operational the way that it was designed. These three visits are at no charge to the original client.

Client Owned Equipment

We do not offer any warranty for equipment provided by our clients.

Equipment Warranty

After the 90- day labor warranty period is complete we will continue to honor the manufacturer's warranty for the duration of the warranty period. However, the equipment warranty does not include labor or trip charges. The manufacturer warranties vary greatly. Virtually every electronic warranty is at least a year, and some are longer. If you have questions about the term of warranty, please ask your salesperson for a complete list of all of our manufacturer's warranties.
